Coking of Coal
In Western Canada

The coke which is used for metallurgical operations in Western Canada is all made in beehive or Belgian ovens. While the latter are given preference by reason of their greater capacity for heating purposes, the by-products, as in the case of the beehive furnaces, go to waste. There are at present in Canada, 2,024 ovens which do not save the by-products as against 730 which do save these valuable constituents of the coal. In Western Canada there are 1,935 ovens of the former class and none of the latter.

Mr. F. E. Lucas, manager of the ovens of the Dominion Coal Co., estimates the saving effected by the use of the by-product oven to be \$1.93 per ton of coke made. This figure will, of course, vary to a certain extent with the locality in which the coke is produced, due to differences in the coal and yield which is secured when coal is cooked by modern methods, more especially when the enormous tonnage of coke consumed in modern smelting is borne in mind. In the year 1912, as much as 405,457 tons of coke were made in beehive ovens in Alberta and British Columbia, representing a waste of approximately 12,569,167 pounds of ammonium sulphate and 43,383,899 gallons of tar; not to mention the coke, cinders, creosote and other minor products and the immense amount of gas which would be available for heating and lighting purposes.

The principal objection which is urged to the introduction of the by-product oven is the expense of installation. But it is hoped that this objection will be overcome wherever possible, since, as shown above, the by-products have high economic and market value and there will be a growing demand for them.

The tar is being used extensively in the Dominion Coal Co. ovens which may be especially mentioned that of the manufacture of bituminous from slack coal, thus effecting an additional economy in this waste product. Ammonia on the other hand is a fertilizer of the greatest value, for there is a great demand abroad and for which an ever-increasing demand will arise in Canada as the necessity of employing improved methods of agriculture is brought home to farmers. The by-product coke ovens of the United States produced in 1912 ammonia and ammonium sulphate to the value of \$6,519,268.

For some years past in England and Germany attention has been paid to the problem of securing the largest possible yield of ammonia from coal during the process of coking. With the methods of coking ordinarily adopted at the gas works these countries usually obtain a small percentage of ammonia in the gas obtained in sensible form as an ammonium compound. It has been found, however, that, by employing certain improved methods, the yield of ammonia may be increased by as much as 200 per cent.

The immense volumes of gas given off from the coal in the by-product ovens might be readily utilized in connection with associated industries, as, for instance, the burning of cement.

One of the most important problems which presents itself at the present time is the provision of an adequate supply of cheap fuel for the population of the Prairie Provinces of Canada. Very large areas of these provinces are underlain by beds of sub-bituminous coal and lignite which are estimated to contain 100,000,000 tons of these fuels. As yet, however, practically all the fuel in that portion of the plains east of Brandon is imported from the United States, while that used in the country west of Brandon is brought directly from the coal fields of the Rocky Mountains. This entails a long and expensive haul, which results in a high-priced fuel, and any temporary interruption of the supply gives rise to a coal famine.

The reason why the mineral fuels of the plains have not been utilized is that they are expensive to mine owing to the absence of supplies of mine timber on the treeless prairies, and they are also of a lower grade than the fuel from the Rocky Mountains, containing a large percentage of moisture. They thus have a lower heating value than the fuels from the mountains, and furthermore when, after being mined, they are exposed to the atmosphere, they dry out to a certain extent and in doing crumble to pieces even fall to powder, so that they cannot be readily handled and will not bear transportation. Such being the case, if these fuels are to be made available for household use, they must be briquetted, or if they are to be used for manufacturing purposes, they must be either bri-

quetted or used in gas producers.

A series of trials of Canadian fuels recently carried out by Dr. J. B. Porter and Prof. Durley of McGill University for the Mines Branch of the Department of Mines at Ottawa, show that these fuels of the plains are excellently adapted for use in gas producers and are well adapted for the production of power.

The question as to whether they can be briquetted when necessary at a sufficiently low cost to make the enterprise commercially profitable, has not yet been established. Fuels of this general type in Germany are briquetted on an enormous scale, and the United States Bureau of Mines is now investigating the possibility of briquetting the lignites of North Dakota. Any lignite can, of course, be briquetted, if a suitable binding material is employed. This, however, entails additional expense, but many of the German lignites and some of those occurring in North Dakota can be briquetted without adding any binding material.

It is therefore important that an investigation should at once be made into the question as to whether there are not, among the great deposits of fuel-containing the Canadian plains and out-cropping on their surface, some at least which can be worked for the production of a cheap briquetted fuel which will stand transportation and thus supply a need more constant as the population of the Prairie Provinces increases. Such an investigation is to be commenced next summer by the Mines Branch of our Department of Mines and the result will be awaited with much interest.

Another source of waste in the case of our fuel supplies is represented by the smoke nuisance which is now becoming very pronounced in our large cities. While it is difficult to prevent the smoke rising from the chimneys of private dwellings, this is the result of Constantine's fire.

She is at a perfect stand-still in the West, with the Allies gaining every time a driver or an engineer takes place in Russia and Galicia, after numerous losses she is not able to repel the attacks of the Tsar's forces; her merchant marine is unknown on the sea and the few vessels she had trading in the Baltic one is being swept away by British submarines; her boasted fleet, like rats in a hole, is bottled up in the Kiel Canal and other home places of refuge and now she is in a dire emergency to help her distressed Ally, Turkey, making a drive for Constantinople.

Even with the defeat of Serbia and the

fall of Constantinople, Germany would

only extend the territory which she must

fight to hold, and which is an embarras-

sment and a source of weakness. Ger-

many, Turkey and Austria are hemmed in

in the sea.

In union is strength, and this division

of great armies, no matter how large, is

a source of weakness.

BRITISH GRAND FLEET IS READY AND WAITING FOR THE ENEMY

GLIMPSE OF FLEET DOING ITS WATCHFUL WAITING

The Veil of Secrecy over the Naval Operations has been Somewhat Lifted, and a Glimpse of the Fleet has been Obtained, Showing Thousands of Vessels Keeping the Seas Clear

For the first time the veil of secrecy, over the British naval operations has been lifted, and the correspondent has easily visited the Grand Fleet at the great naval bases. At one naval barracks he saw dry docks capable of docking the largest of dreadnaughts, which had been built since the war began. Maps were shown the correspondent where the German submarine fleet had been sighted, and which the results of attacks were classified under "captured," "supposed sunk," and "sunken." When bubbles are observed in a long line of smoke from some spot in smooth water, it is taken for granted that a submarine's career has been ended.

"What is your officer was asked, "How do you get them?" his answer was: "Sometimes by ramming, sometimes by gunfire, sometimes by explosions, and in other ways we will not tell."

All the officers aboard the battleships and armored cruisers are engaged in their engines in search of great sport.

The admiral commanding at an important naval base told the correspondent that England had 2,300 trawlers, mine sweepers and other auxiliary vessels, all of which were on duty in the work of blockading from the British Channel to Iceland, and in keeping the North Sea clear. The German submarine fleet had been most zealous in their important part in overrunning the kind of naval warfare Germany wages.

At the naval base on which the correspondent was a passenger, after a cruise at sea and following the coast, turned inland, he saw the British Fleet lay at anchor, he saw a target being towed in the customary manner for firing practice by some of the cruisers. "We have at all the time," an officer explained.

The practice of the cruisers finished, the British fleet lay at anchor in formation among the immense fields of gray shapes at anchor in precise order, which as the torpedo boat destroyers had been most zealous in their important part in overrunning the kind of naval warfare Germany wages.

In the tiny melting into the sea even the Queen Elizabeth, back from the Dardanelles, was seen with her tonnage and gun power unless compared with the inflexible, the flagship of the English fleet, the Queen Mary.

The crew of the light cruiser squadron which just had come from "sweeping" the North Sea, as scouting is called.

Every deck was stripped for action, steam was up in every ship, and as

The Dardanelles

Destinies of Higher Civilization Hang on Issue of Fight in the Hellespont

Nations may fight on their armor and go to war, but dominant factors invariably interpose to fix the place of decisive battle. This war is no exception to the general rule. France and Britain both have the cockpit of Western Europe. There great armies and immortal generals have contended to the death for control of the continent. Similarly, also is the central fact that all the great historic campaigns for the control of Eastern Europe have been decided in the Dardanelles.

That the Dardanelles had proved to be the maker and unmaker of empires, was an intensely interesting article in the Quarterly Review, by Dr. Walter Leaf, who assisted Mr. Lang and Mr. Merton to trace the history of the world's greatest times, as Dr. Leaf points out, the Black Sea, or Euxine, trade has been one of the most vital components of the world's commerce ever since before the Christian era the King of Troy, from his fortified castle at the mouth of the Hellespont, controlled the trade of the Black Sea, and led to the capture of the stronghold by the adventurous Greeks. Poetry immortalized the stories of Troy, Achaea, but the root of the trouble between the Trojans and Lydians of B.C. 1200 was the same as it is today. Germany, the Hellespont, the Suez Canal, the Americas, and the fortresses, the unrest in French Morocco, the Seausus rising in Tripoli. It is a grave problem.

German influences are suspected in a score of other quarters. The Komanian War, which has been the historic struggle to British Czarism shortly before the war, is known to have been organized from Berlin. Similarly with the native riot in Singapore, the Chinese, American, and fortresses, the unrest in French Morocco, the Seausus rising in Tripoli. It is a grave problem.

These tremendous machinations are going to recall upon the heads of the nation that planned them, for there is not the slightest doubt that all the civilized world is involved in the German immigration after the recent exposures of the manner in which these people above the whole are responsible for the growth of the nation. The next sixty-five millions of people are deliberately qualifying for the position of the world's conqueror. Every man's hand is being used, and their children, and they will find that the civilization which they have founded so solidly and their children's children to the third and fourth generation, to pay a very terrible price.—Montreal Star.

MISSES WILSON ON PROGRAM

President's Daughter to Address Wisconsin Teachers on School as a Community

Miss Margaret Wilson, daughter of President Wilson, has accepted an invitation of the community centre's section of the Wisconsin State Teachers' Association to speak at the meeting in Milwaukee on Nov. 4. Miss Wilson's topic will be "America's Opportunity—Education." Schoolhouse, the principal newspaper of the State, Principal the Community Society.—Chicago Tribune.

The Gas Caught the Germans

"There is a grim humor in a story which comes from Petrograd," says a London, Eng., paper. "Three thousand German soldiers were captured by the British at Ossiovia. They had been sent to the front of the Hellespont. The downfall of the Byzantine empire came with its failure to defend this vital strategic point. The British took the city in 1365, and Constantinople in 1453. Since that time the Turk has maintained his hold on the Hellespont, and the British have been the masters of this great waterway through which western civilization draws upon the vast resources of the eastern world. His forces have been increasing. Once more the gas-tube to eastern trade and wealth is being forced. Once again the destiny of high civilization hangs on the result of the fight in the Hellespont."—Toronto Globe.

The conversation was being eagerly listened to by reporters and as he said, among other things, to what he attributed his long life and good health, "Well, the old man replied, "I have been a gambler all my life right now. You see, I've been bargaining with two or three of them gamblers, medicine concerns, for a couple of weeks, but I am quite dead."

Rural Schools About Chicago are Advanced

Garden and Poultry Clubs in Each District Help Interest of Farmers and Youth
(By Henry M. Hyde, in Chicago Tribune).

There are 2,000 new sign boards on the country roads of Cook county, each of them pointing the way in the same direction—the direction of the movement for the making of the rural schools about Chicago the most advanced in the country.

Under the direction of County Sup't. Tom G. Smith, the garden and poultry or canning club has been organized in each of the rural schools and 2,000 boys and girls have already joined. The clubs have been formed where each of these pupils lives a signboard has been erected. It reads: "Cook County School, Field and Garden Club."

Below each sign appears the name of the individual pupil. Recently there was a meeting in Sup't. Tom's office the first meeting of the five rural districts, each of whom has charge of one of the divisions of the county. The meeting was held to review training teachers who are spending the time this summer traveling the country roads, inspecting the club gardens and young gardens and young gardeners and poultry raisers.

There is another county in the country which has an organization of garden clubs, the seat of whose organization has been attempted. The meeting was therefore unique in America. And it was inspiring to listen to the enthusiasm of various speakers on the part of the officers, who are spending the summer in the field, and the new plan was being received.

German Barbarities Are Beyond Belief

Ghastly Revelations of Cruel Cowardice and Barbarity

There has been a common desire, even in the British empire, to discredit the stories of British atrocities told by the German armies. British generally discount them to some extent, simply because the British are a nation of civilization, and the German army is a nation of savagery.

However, there are many who believe that "probable things" are not as bad as reported.

It takes exactly four days at our shops to finish a suit, and we guarantee satisfaction and an accurate fit without a try-on.

Values from \$18 up.

W. E. COOPER - Blairstmore

Anglican Church

Service will be held as usual on Sunday morning at 11 o'clock. Preacher, Mr. J. Bolden, of Bellville. Sunday school at 2:30 p.m.

On Thursday next, Nov. 18th, an entertainment will be held in aid of the church. A good programme of local talent is being arranged, and in addition there will be humorous sketches and drills by the elder girls of St. Alban's, Coleman, under the direction of Mrs. F. Graham. For further particulars see bills.

LOST—On Friday, October 29th, a lady's brown curly coat. Finder will be rewarded on leaving same at The Enterprise office.

R. J. Ritchie-Patterson and B. C. Gillan, of the W. A. Henderson Co., were here this week, making up the annual returns for the town.

Blairstmore was not enlightened by the visit of a Chinaman named Silvery Moon, but it is probable that the Moon got away with some silver.

OF LOCAL AND GENERAL INTEREST

Crocuses are reported in bloom in the foothills around Cranbrook.

A. Cameron and J. Fairhurst, of Coleman, visited Macleod on Thursday.

Hon. Robert Rogers will address a meeting in the Majestic theatre at Lethbridge tonight.

Send to me for free samples Wheat and Chicken Feed. \$1.55 Cowley.—C. H. POWELL.

The dance given at the Alberta hotel on Monday night was a success, over fifty couples attending.

One of the sorrows of a newspaper reporter's life is that every night he has to revise his list of friends.

The regular meeting of the Blairstmore town council was held last night, very little business being transacted.

The public school at Hillcrest has an enrolment of over 200 children, who are looked after by three teachers.

Miss Clark, of the Hillcrest teaching staff, met with a slight accident last week, but is able to be about her duties.

A. Cameron was down from Coleman on Sunday, and entertained a number of his friends at dinner at the Sanatorium.

FOR RENT—Six-roomed dwelling, with bath room and hot and cold water fitting. House nicely located. Apply to The Enterprise.

Word has been received from Charlie Roy, who has seen much fighting in France. Charlie stated that he was O.K. at time of writing.

The annual meeting of the Alberta provincial branch of the Canadian Red Cross Society was held at Calgary on Monday. The local branch was represented by Mrs. J. M. Carter.

J. L. Jenkinson, K.C., of Calgary, is seated for the position of judge of the district court for the judicial district of Calgary, made vacant by the appointment of Judge Carpenter to the Alberta Public Utilities Commission.

Harry Lambeth, at one time manager for the "41st" Market Co. in this district, and who went over to the Old Country about a year ago on a visit to his parents at Cheshwick, left England with his wife on Oct. 29th for Canada, and arrived in Frank this morning.

On Sunday next the Union church services at the Baptist church on Sunday night was "The Christian Church." He compared the church of the olden days with that of the present day, and showed why the ideals of ancient Christian life should be the ideals of the present day Christian. He felt that no organization in the past, or of today, could be regarded with as much importance to humanity and civilization as the Christian church. During his discourse, the reverend gentleman paid a very high tribute to the work of Oddfellows, which only, he declared, could compare with the great works of the church. At the close of his address he made a special appeal to the congregation on behalf of home and foreign missions, stating that the amount expected from the Blairstmore mission for the year was \$75. As a result of this appeal, the collection on Sunday night amounted to in all \$46.15. Rev. McLaurin speaks very optimistically of the future of the united congregations of Blairstmore.

The death occurred on Sunday, Oct. 30th, of John Hatfield, after a short illness. Deceased was born on May 6th, 1836, in the town of Millar, Derbyshire, England. He came Westville in March, 1872, where he worked at Mining until about fifteen years ago, when advancing years compelled him to retire. He was a quiet industrious citizen, and was respected by all who knew him. He is survived by his widow, one daughter, Sarah E. (Mrs. Donald McNeil), and four sons, James, at Eureka, John and Sam in Coleman, Alberta, and Joseph, with the 64th Battalion, and who was home for the funeral, which was held on Tuesday, burial being made in St. Phillip's Cemetery—Westville Free Lance.

J. E. Woods, of Pincher Creek, was in town today.

How a woman does enjoy quarreling with a man who isn't quarreling.

Mrs. Kidd's maternity home, Box 95, Phone 151. Wedding cakes decorated.

James Turnbull, a Blairstmore old-timer, is now in the trenches somewhere in France.

Saskatchewan publishers have formed a provincial branch of the Canadian Press Association.

The congregation of the Institutional church at Coleman has extended a call to Rev. Mr. Cameron, of Cardston.

The Canadian Northern has started laying steel on the branch southeast of Canmore to Battle River, a distance of sixty miles.

The editor of the Natal Reporter complains of poor health. He says the doctors advise him to sell out or be snuffed out. Gee, that's hard!

A grand operetta is being staged at the Workers' Hall, Pellyville, tonight. We understand that the same operetta will be staged at the Blairstmore opera house in the very near future.

A grand operetta example has just been set by the pupils of the Blairstmore school, who last week undertook to raise a fund for the purpose of sending Christmas presents to our boys in khaki. We understand that upwards of \$20.00 was collected.

A glance at the list of contents of the November issue of Rod and Gun in Canada magazine indicates that this number is of general interest to the outdoor lover and sportsman, while a reading of the number justifies the first impression. "Fig Alice and the Portage of Death" is a Hudson Bay story by R. J. Fraser of pathetic interest, concerning a veritable "portage of death" which was negotiated by an unfortunate band of Indians, the victims of a factor's cruelty. "Martin and the Mortgage" is another of H. C. Hadson's stories and has to do with the capture of a den of black fox puppies. "How Samuels caught the Game Hog" is a story of deer hunting by camera, v.s. deer hunting by gun, written and illustrated by F. V. Williams. There are other stories that make a like appeal to the reader of a sportsman's magazine, as well as the usual special departments dedicated to guns and ammunition, fishing, etc. W. J. Taylor, Limberlost, Woodstock, Ont., are the publishers.

The interior having recently been drawn to the fact that a number of schools throughout Western Canada are lacking in maps illustrative of the general topography of the Province of Alberta, etc., the Honorable Dr. Roche has announced that several useful departmental publications are available for distribution amongst the various educational institutions throughout the Province. Included in the number is an interesting map of the Dominion which shows general information with respect to railways, cities and towns, etc.

In view of present financial conditions and the spirit of economy which is prevalent, advantage is being taken, to a very marked extent, of the opportunity afforded, to present free of charge literature which can be used advantageously for educational purposes.

Copies of those departmental maps which are adaptable to school use, may be obtained upon application to the Superintendent of the Railway Lands Branch of the Department of the Interior, Ottawa.

Several British steamers have been reported as sunk by Hun submarines during the week.

The services at Central Baptist church on Sunday last were largely attended, both services being addressed by Rev. C. C. McLaurin, superintendent of baptist missions.

The Secretary of the local branch of the Red Cross Society acknowledges with thanks the sum of twenty dollars and sixty cents (20.60) from the October 1st to 15th pay roll of Greenhill mine.

M. A. Brimacombe, grand patriarch of the Grand Encampment of Alberta, paid an official visit to Crows' Nest Encampment No. 8 on Wednesday evening, and left for Lethbridge by the 21:02 train, where last night he visited Lethbridge Encampment No. 7. Both meetings were well attended, and degrees were conferred in a capable manner.

Fanning Your Girl In Church

You're as red as beet and half dead with the heat.

When you're fanning your girl in church,

And you're stuck on the girl and you're stuck on the seat.

When you're fanning your girl in church.

Backward and forward your hand never ceases.

And you look and you fan, but you're hot just instances.

And you wonder and wonder if really it pleases.

When you're fanning your girl in church.

She sits self-composed in her transparent waist.

When you're fanning your girl in church.

Around it how easily your arm could be placed.

When you're fanning your girl in church.

She sighs the choir, while you just admire.

Perspire and admire and admire and perspire.

And you know that your chest is for her all ails.

When you're fanning your girl in church.

The long sermon tires you, your new clothes feel hot.

When you're fanning your girl in church.

But there's nothing so sweet, as the perfume she's got.

When you're fanning your girl in church.

Oh, here's to the days of your puppy love bliss.

When you went with the sweetest of sweet village misses.

While you sat through the sermon and just thought of kisses.

While fanning your girl in church.

The small German cruiser *Udine* has been sunk by a British submarine off the Swedish coast.

W. L. Phillips, who for about eighteen months has presided over the affairs of District 18, U.M.W. of A., has resigned.

Pte. David Kemp has joined the signal corps of the 1st Canadian Pioneers, and leaves Winnipeg for England this weekend.

Nomination of officers will take place at the meeting of the local Oddfellows' Lodge to be held on Tuesday, November 23rd.

BORN—At St. Eugene Hospital, Cranbrook, on Thursday, November 11th, to Mr. and Mrs. Fred Denison, of Blairstmore, a daughter.

Rev. Mr. Cameron, of Cardston, has accepted a call to the United church at Colemay, and the formal induction will take place the first week in December.

William McKenzie, Waterville, received a message on the evening of Oct. 6th informing him that his brother Rod, McKenzie, had died suddenly at Fernie, B.C., at the age of 58 years. A letter following the message stated that just as the deceased came into his boarding house and asked for a drink of water he fell over and expired, death being due to heart failure. Deceased was unmarried and had been away from Picton County for the past 35 years or more. Interment was made at Fernie, B.C., funeral arrangements being made by the Union to which he belonged. He leaves two brothers, William and Murdoch McKenzie, residing at Waterville—Westville Free Lance.
